Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Tetsutaro (JP 2001 317953) or Tetsujiro (JP 101325953).

Tetsutaro teaches a method, a communication system, and a mobile user equipment including a user of a first user equipment (cellular phone 146; see par. 0029) in a first vehicle 147, presents navigation information (route guidance information in the form of an arrow or alphabetical information, see fig. 4a-4d which was received from a second user equipment 100 (par. 0018) in a preceding vehicle (par. 0018, the top car) by way of a mobile phone 145 (par. 0026). The navigation information is based on location information regarding the second user equipment, see par. 0022, current position data of the second vehicle are determined by its position signal generating section 108, which comprises an odometer 105, direction sensor 107, and a GPS 102, see par. 000018. This information enables the user of the first equipment to follow the second user equipment, see par. 0043. It is clear that the generation of navigation information takes place substantially in real-time, since the information is needed and used to guide the following vehicle in real-time.

With regard to claims 22-23, 26-27, Tetsutaro teaches a user interface 146.

With regard to dependent claims, Tetsutaro further teaches the steps of presenting navigation instructions (the arrows or the text instructions of fig. 4; see par.

Art Unit: 3662

0031), triggering the generation of navigation information by a predetermined event relating to an operation of the vehicle (par. 0042), transmitting signals from the first user equipment to the second user equipment (par. 0042), presenting the navigation guidance by means of a plurality of user equipment based on the location information regarding the second user equipment (par. 0035).

3. Tetsujiro teaches the claimed method, a communication system, and a mobile user equipment (see par. 0023-0034; fig. 1-8).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dao L. Phan whose telephone number is (703)306-4167. The examiner can normally be reached on M-F 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tarcza Thomas can be reached on (703)306-4171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

5. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
